

NURSE AI OS • FOUNDING YEAR 2026

The Founding Year Guide

A \$1,500–\$2,999 professional program. Free this year, for nurses and nursing students. Not a discount. Not a trial that bites later. This guide explains exactly what you get, what stays free, and what we will never do.

Agents propose. Humans judge. Nurses steward.

Free for nurses and nursing students • Founding Year 2026 • nurse-ai-os.org

Why free? Florence didn't charge the soldiers.

She held the lamp and kept the ledger, and the wards changed. We are building the same way: nurse-first, evidence-led, dignity-first. Your perspective is worth more to the future of healthcare than any tuition — **we would rather have you at the table.**

So during the founding year of 2026, the entire core program is free for nurses and nursing students. Not a stripped-down teaser. The whole thing: the masterclass, the governed operating system, the personalization, the roadmap, the community. Here is what that would normally be worth:

What you get, and what it's worth

What you get	Comparable value
Nurse-Centered AI Masterclass — the guided build across personal, professional, and community life	\$600
Governed Nurse AI OS — a no-patient-data, safety-gated system personalized to you	\$400
SOUL personalization — the system shaped around your values, boundaries, and the life you actually live	\$150
30-Day Roadmap, workbook, and starter kit — four role tracks, ~20 minutes a day	\$200
Lamp Huddle community year — weekly stewardship support and belonging	\$150
Total comparable value	\$1,500+
Your price this founding year, as a nurse or nursing student	\$0

- Never charged for the core learning
- No credit card to start
- No auto-enrollment, ever
- No patient data — we do not want it

What's always free — and what may be paid later

Always free for nurses

The core learning: the SOUL Quiz, the five-step setup, the starter kit, the 30-Day Roadmap, the workbook, the six Make-It-Yours workflows, the safety and governance rules, and the weekly Lamp Huddle. This is the lamp — it stays lit, and it stays free.

May carry a subscription later

Guided cohorts (small-group, facilitator-led builds), **credentials** (verified evidence-of-growth pathways, always with human review), and **institutional programs** (units, departments, schools). If any of these ever cost money, you'll be told plainly and asked plainly — never enrolled, never charged by default.

The never-list

- **We will never charge nurses for the core learning.** The founding-year promise doesn't expire on the parts you've already claimed.
- **We will never ask for patient data.** Not for training, not for demos, not for "personalization." No PHI, ever, at any tier, in any product.
- **We will never auto-enroll or auto-charge.** No card on file, no silent conversions, no trial that bites later.
- **We will never imply certification without human review.** Any credential we ever offer will be judged by humans, not stamped by a machine.

How to claim it — the five-step setup, one evening

There is no application and no waitlist for the core program. Claiming your founding year *is* the setup:

- 1 **Install Hermes** — the free, open-source AI engine your system runs on — with the nurse's cheat sheet beside you. (Rather not install anything yet? You can do steps 2–5 in the browser AI you already use.)
- 2 **Take the 2-minute SOUL Quiz** at nurse-ai-os.org, then load your SOUL file into Hermes as its standing instructions.
- 3 **Download the free starter kit** and show Hermes where the folder lives.
- 4 **Build your dashboard with one prompt** — and bookmark it. That's your station board.
- 5 **Run your first prompts** — the morning huddle, a study map, a shift-recovery checklist — then let the 30-Day Roadmap carry you forward, about 20 minutes a day.

The catch, honestly stated

There is one, and it's this: **we're building the founding cohort.** A free founding year gives us a community of nurses who shape the program, stress-test the safety rules, and tell us what actually helps at 3 a.m. on a Tuesday. Some of what we learn will become paid offerings later — guided cohorts, credentials, institutional programs — and founding-year nurses

will have helped build them. That's the trade: your honest feedback and your presence at the Huddle, in exchange for the whole program. No hidden clause. If you take the free year and never come to a single call, that's allowed too.

The boundary, in every product, forever: Nurse AI OS is for learning, personal productivity, career growth, and non-clinical support. It is not a clinical decision system. Never enter patient names, charts, screenshots, or any patient-identifying information.

Questions? A human answers: great.ai.nurses@gmail.com · Start at nurse-ai-os.org/start-here.html

Be a Nightingale for your time. Carry the lamp. Keep the ledger.
